

food packaging specialist

The largest inventory of vacuum pouches in Canada

*and much more!*

## our Services

We specialize in vacuum pouches and modified atmosphere packaging, Duropac and its team are offering free consultation service all through Québec, Ontario and eastern Canada.

With a wide range of specialists to provide Duropac accurate information, we are in position to meet every specific need for each of our customers.

The Duropac team is dedicated to maintaining constant research of new materials and suppliers from around the world. Though we support local suppliers whenever possible, we must also import products from the USA, Europe and Asia among others in order to satisfy the specific demands of the food industry. We are proud of giving access to the best products in the world to the canadian SME.

Duropac has expanded its storage space in order to meet the more expected than ever "JUST IN TIME" service.

## we are there For you

We will be pleased to answer any question you might have by giving you access to our technical advisers.

Since its beginnings in 1992, Duropac has made its way as a leader within the packaging industry.

## our Staff

Our staff goes through an extensive and constant training process. Even a quality product may become useless if improperly used, which is why we offer our clients a free consultation service. Our knowledge goes well beyond our products, we can also advise you on the different types of equipment available on the market, on the life-span of different nutritional products, and on the regulations set forth by the MAPAQ, CFIA, Dairy Counsel, Canadian UPC Counsel and others.

## our Graphic service

Your packaging is an important promotional vehicle. The majority of consumers are impulse-buyers, you only have a few seconds to seduce or rebuff your client. We understand the food industry, a few dollars invested in making your product more attractive will reap five times more if your product is a good seller. Be warned, besides appearance, governments have established several rules to follow; adequate identification of your establishment, list of ingredients, bilingualism, nutritional values and UPC codes are just a few.

## our Printing service

Whether you want small quantities or several million bags, we can offer an interesting alternative. We can stamp your establishment number on-site -no minimum required- and with only a few days for delivery. New equipment allows us to print a high quality logo at a very low cost. We also offer an automatic labeling service for your new products or simply for lower volumes. Whether you choose one color flexography, eight color process, flat color or even Rotogravure for those more important contracts with high-end packaging, we can accommodate your needs. For more information, please contact our graphics department.

Do not hesitate to contact us for all your packaging needs.

## the Products

Duropac has the biggest inventory of vacuum pouches in Canada at your disposal, with no minimum order required and free delivery most of the time

All of our products are USDA / CFIA / FDA approved and we can meet all the tracing specifications set by HACCP.

The right material for every specific use. Starting with your needs in packaging we will help you choose the most accurate packaging method, to give you the optimal sealing efficiency in all your product's properties. We can even produce a thermoformed container specifically designed to meet your requirements.

The required shelf life, cooling and freezing methods, modified atmosphere packaging, distribution method and target market are just a few of the things to consider when coming to determine the best product for your needs. From there we will be able to offer you custom made packaging.

## Through the years, Duropac has developed Specific packaging to meet the market requirements

- ✓ Boilable and cook-in pouches, a must in the food service industry and health establishments.
- ✓ Extra strong pouches for bone-in meat and hard to protect products.
- ✓ Vacuum pouches for fresh fish, meeting the government regulations on prescribed oxygen transmission.
- ✓ Pouches conceived to protect food against color alteration, yet less expensive than standard *Saran*.
- ✓ Personalized printed pouches, pouches designed to reflect the mood of the season. A colourful, well designed package will definitely be more appealing for the potential buyer.

Duropac is much more than a supplier, we are a **Service-oriented** corporation.

**Our Consultants can guide you through your projects from start to finish.**

The **Widest** range of products you can find
